

OfficeServ™ 7000 Series

powerful technology.
affordable growth.

New Version 4.60
major improvements include:

- **Multiple SIP** service providers
- **911 conference** instantly notifies 3 pre-defined stations
- Time shifts + **Daylight Savings Time** instantly **synchronized**
- **Multicast Paging** enables wide scale VoIP Paging with minimal resource requirements
- **MOBEX (Mobile Extension)** improvements such as scheduled access and cell phone callback
- **VoIP Security / Encryption** for Federal and Commercial security compliance

V4.60

specifically designed to improve your business and reduce your costs

heightened **safety and security**

Everyone wants to know that their technology is working to make them safer. V4.60 is doing just that with the new **911 Conference**, designed for schools, high-rises, nursing homes and hotels. This system improvement notifies emergency personnel to exactly where a call originated. In addition, we now comply with the Department of Homeland Security-level for **VoIP bundled voice data protection**.

cost-reducing measures galore

Your savings can start to grow immediately through **Multicast Paging** with minimal resource requirements. **Multiple SIP carriers** allow several ITSP carriers, such as long distance, international and local calls, to be enabled. Lower maintenance costs are gained through the systematic changes to **MOBEX. Network Time Protocol support** means Daylight Savings Time and time zone changes take care of themselves.

flexibility and reliability you expect

With Samsung BCS, you receive a **sales, service and engineering staff** that cares and listens to the people we provide for. Many of the enhancements found in V4.60 were created to address individual needs voiced by our clients. **Voicemail to E-Mail Gateway** with SSL/TLS security (OfficeServ 7030, 7100, 7200-S only) and Conference Card enhancements are among the many user-initiative improvements that appear in this software package. Also included is the new **Phonebook Download** that makes 100 numbers instantly available to every IP phone on your system.

"With Multiple SIP Service Providers I can control costs and have flexibility to choose my domestic and international long distance. Thanks Samsung!"

End User

"I can now schedule my MOBEX calls! No more interruption during lunch, when driving home, and on weekends!"

End User
